Documentary Film For Thursday, August 21:

RUN FROM THE CURE

The Rick Simpson Story

After a serious injury in 1997, RICK SIMPSON sought relief from his medical condition through the use of medicinal Cannabis Oil. When Rick discovered that the Cannabis Oil, with its high concentration of THC, cured cancers and other illnesses, he tried to share it with as many people as he could – FREE OF CHARGE – curing hundreds of people's illnesses. But when his story went public, law enforcement officers descended on Rick's home and stole the medicine Rick was sharing with others, leaving thousands of people without an effective treatment for their cancer, and in many cases, without hope. Even those who were completely cured of their cancer due to Rick Simpson's proven treatment and immense generosity were not allowed to testify on his behalf at the his court trial in September 2007. Everyone (especially those who have lost loved ones to Cancer) needs to see this documentary, so that they may understand that A KNOWN CURE FOR CANCER is actively being DELIBERATELY SUPPRESSED because the so-called "treatment" of Cancer is Big Business, and the pharmaceutical and medical industries continue to put their desire for profit above the care of people!
